Chairman's Forward
主席的話

As the Chairperson , I feel immense pride and gratitude as this year comes to a close. This year, we hosted several events, including a children’ s painting competition and communication training programs for those in need, all of which achieved significant results. However, we are acutely aware that there is still much work to be done to truly foster an inclusive society.

In Hong Kong, many inequalities and instances of exclusion persist. For example, individuals with disabilities face numerous challenges in the job market, which not only limits their professional development but also affects their quality of life. These issues remind us that there is still considerable room for improvement in societal inclusivity.

In this context, we are even more convinced of the importance of promoting Environmental, Social, and Governance (ESG) values. ESG is not just a standard for corporate responsibility; it is an opportunity to create social value. Through ESG initiatives, we can better support marginalized groups and promote fairness and inclusivity in society.

We need to think outside traditional frameworks and seek innovative fundraising methods to better support our mission. For example, we could explore partnerships with businesses to launch more meaningful social responsibility projects or utilize technology to conduct online fundraising and outreach. These new approaches can not only increase our funding sources but also raise public awareness and support for our work.

Looking ahead, I am filled with confidence and hope. I believe that with everyone’ s collective efforts, we can achieve greater breakthroughs and bring more inclusivity and care to society.

Our goal is for every individual to find their place in society and live a life of dignity and meaning. Let us join hands and work together towards building a more inclusive and beautiful society !
